STREAMLINE BACK-OFFICE WORKFLOWS

iii innovative

Libraries who strategically leverage Innovative Resource Sharing to automate processes and shared reporting and analysis create more time-saving workflows. Leading research firm Hobson & Company (H&C) conducted independent research with 18 Innovative clients and here's how libraries in Innovative Resource Sharing networks improved their time management.

▼70% reduction

REDUCE TIME SPENT PRICESSING SHARED RESOURCES

Disparate systems, manual and highly variable workflows, and outdated technology all add up to inefficiency in Interlibrary loan (ILL). By facilitating shared resources across a consortium of libraries, Innovative Resource Sharing can significantly reduce time-consuming ILL and digital loan transactions. How? By offering seamless integration with each library's local ILS, automating discovery and request processes, and facilitating fulfilment by providing real-time updates in the patron's ILS record.

▼50% reduction

CUT TIME SPENT ON INTEGRATED LIBRARY SYSTEM (ILS) REPORTS AND ANALYSIS

A lack of ILS integration and outdated technology can really hinder a library's ability to run reports or analytics on Interlibrary loan (ILL). Innovative Resource Sharing provides a better solution. It gives you quicker, easy access to insights on consortia collection usage and utilization, transaction activity and analytics—all data that empowers better business decisions.
