Ready. Set. Sierra.

Migrating from Millennium to Sierra is a simpler and easier project than you might think. From start to finish, your ILS can be migrated quickly and easily, and most of the heavy lifting is done by the Innovative team.

### Typical timeline, includes hosting.

**Legend:**
- **Innovative Task**
- **Library Task**
- **Joint Task**

**Details:**
- **Week 2: Introduction Call** – Between Innovative Project Owner(s) and Library Project Owner(s) to review project and Sierra migration process.
- **Week 6: Configure Sierra Backup** – Innovative is responsible for backups from this point.
- **Week 6: Sierra Preview** – Read-only instance of Sierra running side-by-side with Millennium on the app server, and reading from the Sierra DB server.
- **Weeks 6-7: Seed the Sierra Database** – After seeding, Sierra is kept in-sync with Millennium in real time by means of an automated process.
