

HOW SIERRA REDUCES LIBRARY SERVICES OVERHEAD

Libraries who use Sierra realize the value of easy third-party integration and the cost-savings and peace of mind that comes from a hosted solution. Here's how Sierra can save you both time and expense.

REDUCE TIME SPENT MAINTAINING AND INTEGRATING THIRD-PARTY APPLICATIONS

It can be extremely tedious to enter data in multiple places for print serials. Sierra includes an acquisitions API that seamlessly integrates with third-party acquisitions vendor applications in real time. Librarians can measurably improve their efficiencies using Sierra's electronic data interchange (EDI) standards for invoices, Quick Click, and Inventory Express functionality.

REDUCE ON-SITE ILS EXPENSES

Maintaining an on-premise ILS and its IT infrastructure can add considerable cost to your library's ongoing operating expenses, not to mention the maintenance and service fees you incur. As a fully hosted system, Sierra eliminates expenses related to outdated ILS solutions and includes installation, management and maintenance, with proactive performance monitoring and around-the-clock tuning.
