## Complex Projects Made Simple

Reduce the back and forth between the stacks and the desk, cut down on repetitive material handling, and decrease reliance on paper reports with Mobile Worklists for Sierra.

Mobile Worklists is a native iOS app that makes material handling and management tasks more efficient, saving time and paper for library staff. Fully cloud-based and integrated with the Sierra Desktop App, Mobile Worklists provides new functionality for traditional library operations.

USE MOBILE WORKLISTS FOR:

- Weeding
- Searching Projects
- Language Support
- Placing Items on Display
- Managing New Collections
- Relocation Projects - Moving Items to and from Storage, between Branches, and throughout the Library
- Labeling Projects
- Generating Lists of Course Reserves Items
- ILL Delivery Tracking
- Emailing Lists
- Inventory Projects

sierra
mobile worklists

"We saved enormous amounts of time and effort. We didn't have to pick up books from the book truck, call up each individual item record and relocate the item. We could simply create lists and rapid update the location. With regard to the storage items, we were able to [simply] delete the records. It was much more efficient to use Mobile Worklists."

- Amy Moberly,
California Western School of Law

"We see this as potentially being a great asset for changing status or locations at our branch location where Technical Services staff are not typically scheduled – staff at the branch can scan items into Mobile Worklists and export, and then the staff in Technical Services can work on the list."

- Ryan Gessner,
Middle County Library

"This makes weeding a breeze and all staff LOVED how easy it was to use and how fast it made their weeding! WOW! "

- Eeva Stierwalt,
London Public Library

FEATURES

- Create lists of records in the app

- Scan barcodes with the camera on your mobile device using integrated barcode scanning from Manatee Works, Inc.

- Send lists to Sierra and update them in Sierra using Global or Rapid Update

- Manage complex projects with built-in list management capabilities
