

A woman with long brown hair, wearing a black top, is standing in a library. She is holding a thick, old book in her left hand and a black smartphone in her right hand. The background shows bookshelves filled with books, slightly out of focus.

In every aisle. On every shelf.

Vega Mobile Worklists puts the power in your hands

Mobile Worklists is a Modern Library Award winning app that empowers library staff to manage collections and circulation tasks effortlessly from a mobile device. Whether handling inventory, processing holds, or updating item records, Mobile Worklists reduces repetitive tasks and eliminates unnecessary trips to a workstation — boosting efficiency and accuracy.

Why Mobile Worklists?

Enhanced Mobility

Work from anywhere in the library with real-time access to catalog updates.

Increased Efficiency

Streamline workflows, reduce manual data entry, and eliminate paper lists.

Improved Accuracy

Update item statuses, apply batch edits, and maintain precise inventory records.

Seamless Integration

Fully integrated with Polaris and Sierra for real-time updates without manual syncing.

“We saved enormous amounts of time. Instead of calling up each record, we could create lists and update them rapidly.”

— Ryan Gessner,
Middle County Library

Mobile Capabilities for More Staff

Mobile Worklists is expanding beyond Sierra to Polaris, delivering a modern, user-friendly experience to more library staff. Unlike third-party mobile apps, Mobile Worklists is natively integrated with Sierra and Polaris, ensuring real-time updates and eliminating data syncing delays. Library staff can manage collections and circulation tasks with greater speed and accuracy. Mobile Worklists will be available for Sierra and Polaris libraries in 2025. Key Features & Benefits

Real-Time Circulation Management

Check out items, process returns (with backdating), and log in-house usage from your mobile device.

Simplified Inventory & Shelf Management

Conduct shelf reading, manage inventory, and handle relocation projects on the go.

Flexible List Management

Create and edit lists for weeding, course reserves, and special projects.

Export lists back to the ILS for more processing. Easily share lists with staff via email, and with CSV export options.

Advanced Item Handling

Scan barcodes and RFID tags using your mobile device for quick updates. Edit item details, apply batch edits, and ensure up-to-date catalog information.

Scalable & Future-Ready

Upcoming enhancements include staff communication tools, AI-powered cataloging, patron registration, and Vega Data Lake integration.
